Web Announcement 2226

Search Fee Schedule Application Enhanced for Codes that Require Multiple Modifiers for Payment

Effective June 15, 2020, an enhancement has been made to the Search Fee Schedule application on the Provider Web Portal to return results that include multiple modifiers on a single row. This enhancement will assist providers such as provider type 33 (Durable Medical Equipment (DME), Disposable, Prosthetics) when searching for rates as the reimbursement rate for some DME codes is dependent on using multiple modifiers.
